Startup Grind San Diego hosts monthly startup events to teach, inspire, and connect entrepreneurs. In the Fireside Chat series, leaders in tech are interviewed about their where they've been and where they're headed. Last August, Rachel Gauvin interviewed Karen Clark Cole about her career path, what's next for UX, and where we got the name "Blink."

This event was produced in partnership with Fresh Brewed Tech. Fresh Brewed Tech aims to bring cohesion and awareness to the San Diego tech ecosystem. While the team highlights local leaders, the aim is to amplify the great community and technology through multiple media channels. The Fireside Chat interview aired on Fresh Brewed Tech's "Tacos & Tech" podcast.
